Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-14, 18-22 and 24-29 are rejected under 35 U.S.C. 103(a) as being unpatentable over the European Patent No. 0 595 005 A1 in combination with Klevay et al (American Journal of Clinical Nutrition, Vol. 75, No.3, 550-554, March 2002).

The European Patent discloses a composition consisting of vitamin B6, folic acid and vitamin B12 which is useful in lowering homocysteine levels, which plays a role in vascular disease (page 4). The European Patent teaches that vitamin B12 may be used in the form of cyanocobalamin or hydroxycobalamin or both (page 6, line 31). The European Patent teaches coadministration of the composition consisting of vitamin B6, folic acid and vitamin B12 with an antioxidant, such as vitamin E (page 7, line 2). The only difference between the claimed composition and the composition disclosed by the European Patent is the presence of magnesium in the present composition. However, since Klevay et al teach that magnesium plays an important role in the protection against vascular disease (see, for example, Introduction), a person having ordinary skill in the art at the time the instant invention was made would have been motivated to add magnesium to the composition disclosed by the European patent because such a person would have expected the resulting composition to be useful in the treatment and prevention of vascular disease.

Applicant's arguments and the declaration with respect to claims 1-14, 18-22 and 24-27 have been considered but are moot in view of the new ground(s) of rejection.
